RESEARCH INTERESTS

At present I work primarily on post-quantum security proofs for symmetric-key cryptosystems. My research focus is on finding ways in which classical proof techniques can be generically applied in post-quantum contexts. Other topics of interest for me include quantum and classical cryptanalysis of symmetric-key modes, indistinguishability of symmetric-key constructions against classical and quantum adversaries, applications of provably secure symmetric-key schemes in messaging protocols and other practical scenarios, and machine-learning-based distinguishing attacks on symmetric-key cryptosystems.

My doctoral research mostly focussed on the construction of modes of operation based on ideal small-domain primitives like random permutations and random functions, and coming up with reduction-proofs of their security guarantees using counting techniques and other tools of discrete probability. In the past I have looked at the possible application of cryptographic designs and protocols for enhancing privacy and security in blockchains and other decentralised networks. I have also looked at the applications of results from communication complexity in analysing space-time trade-offs in the cryptanalysis of modes.

RESEARCH POSITIONS HELD

Apr. 2024 – present	CRC, TII Abu Dhabi, UAE Position: Senior Researcher
Oct. 2022 – Mar. 2024	LASEC, EPFL, Switzerland Position: Post-doc
Mar. 2020 – Sep. 2022	COSMIQ, Inria Paris, France Position: Post-doc (till Feb. 2021) SRP (since Mar. 2021)
Aug. 2013 – Dec. 2019	Cryptology Research Group, ASU, ISI Kolkata Position: JRF (till Aug. 2015) SRF (since Aug. 2015) Supervisor: Mridul Nandi
